

## Abortion

### Policy Statement

**One Nation** recognises that for many and varied reasons abortion will unfortunately always be in demand.

Legal abortion is a safer alternative to backyard procedures.

We believe in sex education at high-schools for our young people.

We also have to change young peoples present mindset, as in today's world, sex is often treated as a recreational pursuit or entertainment.

Emphasis must be placed on moral responsibilities and self-worth.

Reckless behaviour does create future emotional stress.

The pitfalls of engaging in unprotected (and indeed often enough in "protected") sex are well known and statistics show rising figures of debilitating diseases with their long lasting effects and the subsequent stigma attached.

We also must create awareness of the "side effect" of an unwanted pregnancy and the recognition of ongoing future responsibilities.

### Policy

Abortion should only be allowed for serious medical and psychological reasons, not lifestyle considerations.

We will legislate to maintain a decent level of sexual content in all facets of the media and telecommunications.

**One Nation** will not subscribe to automatic financial support payments for unmarried mothers after the first child.

Responsibility for our own action lies ultimately with us.
