

EMPLOYMENT

One Nation recognises that long-term jobs must come from the private sector.

We want a return to Australian ownership and control of land, resources, public utilities and businesses.

The assets and resources of Australia must ultimately be the property of the Australian people.

One Nation will support:

- Incentives for farmers and small business.
- Remove government “red tape”.
- Ensure fair competition.
- Fair Trade (not Free Trade). Have tariffs in line with tariffs of trading partner.
- Review of international agreements. No to GATS and Globalisation.
- Controls to prevent monopolies and market manipulation.
- Decentralisation of manufacturing and industry where possible.
- Re-industrialisation (Encourage value adding enterprises).
- Preference of Australian companies over foreign tenderers.
- Emphasis on apprenticeship training.
- The right to Union membership on a voluntary basis.
- Fair minimum wage.

One Nation believes that, combined with a strong primary industry and a vigorous resource sector, the stimulation of a broad-based manufacturing sector is vital to Australia’s future well being.

We will not let jobs go offshore.
