

LAW AND JUSTICE

One Nation wants to make crime unaffordable.

Accelerating crime rates, mounting drug abuse, plummeting moral values and the undermining of traditional families are destroying our society.

We advocate a Justice System that protects law-abiding citizens and not the criminals.

Law & Order, Crime & Punishment are community issues and public funded institutions and must not be privatised.

Wherever possible emphasis upon rehabilitating damaged people to enable their return to the community as useful citizens.

We Support

- Return of our legal system into an affordable and just system.
- Zero tolerance and increased mandatory minimum sentences for all crimes.
- No automatic remission, parole has to be earned after 75% of initial sentence is served.
- Prisoners to earn their keep (supervised community projects).
- Offenders to compensate victims.
- Asset seizure (crime syndicates & drug-dealers).
- Voluntary intoxication and use of recreational drugs of any kind is no defence.
- Do adult crime – do adult time (over 16 years).
- Home invasion and car theft to be classified as serious crimes.
- Parents to be given back the authority to be responsible for their children—until the age of 16.
- Rights of citizens to defend themselves (no rights for offenders).
- Re-name the Police Service to Police Force.
- Substantial increases of penalties for attacks on Police Officers while on duty and subsequently equally increased penalties for Police Officers who break the law.
- Streamline administration to free Officers from their desk-bound duties.
- Increase number of Police Officers.

- Introduce a Workers Compensation Fund in line with general industry guidelines for the Police Force.
- Legislate to have cases involving government departments, to be judged by a jury.
- Rescind international agreements which stifle or override Australian law.

We will also act to have enabling legislation in place for

- Sentencing provisions consistent with the seriousness of the offence.
- Enforcement of drug rehabilitation and boot camps as an alternative option to prison. Remove the Drug Court System.
- Equality before the law, regardless of race, religion or cultural background.
- Excluding criminals from collecting damages for injuries sustained during criminal acts.
- The protection of family members from acts of family violence.
- Discretionary police powers to remove children under the age of 16 years from the streets.

Australians have the right to expect a safe environment in their own country. Respect for the law and its administrators is essential. Every citizen is ultimately responsible for his own actions; vexatious litigation must not be entertained.
